

LUNGI MBHETSE MALUNGANA

JUNIOR SOFTWARE ENGINEER | FULL-STACK & REACT DEVELOPER

Lynnwood, Pretoria | 063 742 4934 | malunganalungi05@gmail.com | mbhetech.co.za

PROFESSIONAL PROFILE

Software Engineering student and founder-developer with hands-on experience delivering responsive websites, full-stack applications and business systems for South African organisations. Strong in React, JavaScript/TypeScript, Node.js, Supabase and relational databases, with practical experience translating client requirements into secure, deployed solutions. Currently completing a BSc in Information Technology (Software Engineering) at Eduvos Pretoria and seeking junior software engineer, graduate developer, web developer or front-end developer opportunities.

PROFESSIONAL EXPERIENCE

Founder & Software Developer | MbheTech Solutions, Pretoria 2025–Present

- Consult with clients to gather requirements, define project scope and translate business needs into practical websites and software systems.
- Design and develop responsive front-end interfaces with React, Vite, TypeScript and Tailwind CSS, supported by Node.js/Express and Supabase-based back ends.
- Build database-backed features including authentication, role-based access, file storage, administrative dashboards, payment workflows and online forms.
- Apply secure development practices such as input validation, protected routes, permission-based access and Supabase Row Level Security.
- Deploy and maintain production applications using Netlify, Vercel, Render and Afrihost; diagnose build, environment, DNS and integration issues.
- Manage projects from discovery and UI design through implementation, testing, deployment, client handover and ongoing support.

SELECTED SOFTWARE PROJECTS

MNB Chartered Accountants – Accounting Practice Management System | *React, TypeScript, Express, Supabase/PostgreSQL*

Built an employee-focused platform for CRM, audit and tax workflows, HR, projects, timesheets, documents, quotations and invoicing, supported by role-based access controls.

Lee Pharmacy – Full-Stack E-commerce Platform | *React, Vite, Tailwind CSS, Supabase, Stripe*

Developed product browsing, cart and checkout flows, customer accounts, order management and administrative product controls.

AFM Fountain of Life – Role-Based Church Platform | *React, Supabase Auth/RLS, serverless email*

Created authentication, protected content, announcements, events and role-specific workflows for members, pastors and administrators.

Shiluva Landscaping – Plant Catalogue | *React, TypeScript, Tailwind CSS*

Built a searchable, responsive catalogue containing more than 500 structured plant records, images, enquiries and deployment validation.

Pure H2O – E-commerce Website | *React, PayFast*

Developed a product catalogue, customer login, cart, administrative product management and payment integration.

Everyday Recovery Centre – Nonprofit Website | *React, Web3Forms, Netlify/Afrihost*

Delivered responsive service, gallery, contact and donation pages with online form integration.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3
Front end	React, Vite, Tailwind CSS, responsive UI development
Back end & data	Node.js, Express.js, Supabase, PostgreSQL, MongoDB, Firebase, REST APIs
Security & integrations	Authentication, RBAC, Row Level Security, Stripe, PayFast, Web3Forms
Tools & deployment	Git, GitHub, Postman, VS Code, Cursor, Netlify, Vercel, Render, Afrihost

EDUCATION

Bachelor of Science in Information Technology: Software Engineering (NQF 7) |**Eduvos, Pretoria Campus**

2025–2027*

Current average: 79.4% | Key results: Programming in Python 92%; Software Process, Architecture Design & QA 87%; Software & Security Engineering 84%; Database Systems 74%

**Expected completion in 2027*

Higher Certificate in Software Development Life Cycles | Completed

Covered requirements analysis, system design, Agile and Waterfall methods, testing and quality assurance, deployment, maintenance, version control and collaborative development.

CORE STRENGTHS & ADDITIONAL INFORMATION

Problem solving • Software design • Client communication • Requirements analysis • Database design • Testing and QA • Project ownership • Continuous learning

Citizenship: South African **Languages:** English and Xitsonga **References:** Available on request

About

I am a final-year Software Engineering student at Eduvos Pretoria, pursuing a Bachelor of Science in Information Technology with a specialisation in Software Engineering. My academic work is complemented by hands-on commercial development through MbheTech Solutions, the software development business I founded.

As founder and lead developer at MbheTech Solutions, I have worked with organisations across different industries, gathering client requirements, designing user interfaces, developing websites and business systems, integrating databases and authentication, testing applications, deploying projects, and providing ongoing technical support.

I am currently seeking junior software engineer, graduate developer, React developer, front-end developer, and full-stack developer opportunities in South Africa and internationally. I am also open to remote work.

Education

Bachelor of Science in Information Technology: Software Engineering

Eduvos, Pretoria Campus

- NQF Level 7
- Expected completion: 2027
- Current academic average: 79.4%

Strong results:

- Programming in Python: 92%
- Software Process, Architecture Design and Quality Assurance: 87%
- Software and Security Engineering: 84%
- Database Systems: 74%

Higher Certificate in Software Development Life Cycles

Completed

- Status: Completed

Technical skills

Programming Languages

JavaScript · TypeScript · Python · Java · SQL · HTML5 · CSS3

Front End

React · Vite · Tailwind CSS · React Router · Responsive web design · Mobile-first development

Back End and Databases

Node.js · Express.js · Supabase · PostgreSQL · MongoDB · Firebase · REST APIs

Security and Integrations

User authentication · Role-based access control · Supabase Row Level Security · Protected routes · Input validation · Stripe · PayFast · Web3Forms · File storage and uploads

Tools and Deployment

Git · GitHub · Postman · Visual Studio Code · Cursor · Netlify · Vercel · Render · Afrihost

Featured projects

Production work delivered through MbheTech Solutions and academic/commercial development.

Mistlik Solutions

Engineering and construction company website

Live: <https://www.mistliksolutions.co.za>

A professional corporate website created to present the company's engineering services, industries, capabilities and project experience. The website includes contact and quotation-request pathways and is designed to communicate professionalism, technical competence and credibility.

Technologies: React, Responsive UI, Supabase Storage, Contact forms

Key features:

- Business website
- Contact forms
- Request-a-quotation functionality
- Supabase Storage for document uploads
- Responsive user interface

MNB Chartered Accountants

Corporate website and Accounting Practice Management System

A comprehensive employee-focused business platform developed for an accounting and auditing organisation. The system supports CRM, accounting, auditing, taxation, HR, projects, timesheets, documents, tasks, quotations and invoicing. Only MNB Chartered Accountants employees can log into the system.

Technologies: React, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, Supabase, PostgreSQL

Key features:

- Role-based access control
- Row Level Security
- Employee authentication
- Registration approval workflow
- CRM and practice management modules

Pure H2O

Water-products e-commerce platform

A responsive e-commerce website developed for a purified-water business. Customers can browse products, create accounts, manage their shopping cart, save wishlist items, place orders and track their orders.

Technologies: React, Responsive e-commerce UI, PayFast, Customer authentication

Key features:

- Product catalogue
- Cart and wishlist
- Order tracking
- Administration functionality
- PayFast payment integration

Lee Pharmacy

Full-stack pharmacy e-commerce platform

A full-stack online pharmacy platform that allows customers to browse products, register, log in, manage a shopping cart and complete checkout. The system also supports order management and administrative product controls.

Technologies: React, Vite, Tailwind CSS, Supabase, PostgreSQL, Stripe Checkout

Key features:

- Authentication and Row Level Security
- Product catalogue
- Shopping cart
- Stripe Checkout
- Customer accounts
- Administration dashboard

Shiluva Landscaping

Landscaping website and plant e-commerce catalogue

A professional landscaping company website with a searchable catalogue containing more than 500 plant records. It includes plant categories, images, sizes, prices, enquiry forms and consultation-booking functionality.

Technologies: React, Vite, TypeScript, Tailwind CSS

Key features:

- Searchable product catalogue
- More than 500 plant records
- Shopping cart
- Consultation booking
- Form integration and data validation

AFM Fountain of Life

Church website and role-based church platform

A church platform providing public information, campuses, ministries, academy programmes, events, announcements and protected member functionality. It supports different workflows for members, pastors and administrators.

Technologies: React, Vite, Supabase Authentication, Supabase Row Level Security

Key features:

- Member, pastor and administrator roles
- Login and registration
- Protected content
- Events and announcements
- Serverless email integration

SKILLS DEVELOPMENT & TRAINING

Power Your Potential.

QCTO-accredited programmes in Health & Safety, Machine Operations, and Trade Qualifications. Build real skills and secure your future.
